

C ONVERTING IDEAS INTO MOLECULES

CUSTOM SYNTHESIS & CHEMICAL CONTRACT RESEARCH

The chance for ambitious chemistry people!
We do convert Ideas into Molecules.
Become part of our team!

We are looking for a

Laboratory Technician / Assistant, Chemistry (m/f/d)

with special interests in

- applied modern synthetic organic chemistry
- research and development

The applicant is expected to work self-motivated with a high degree of personal responsibility supporting the R&D of our company. While the candidate is not required to have already gained experiences in industry, she or he should have successfully completed any professional training in a field related to laboratory work (chemistry, biology), preferably with a proven focus on organic syntheses.

We are looking for chemistry focused applicants or for excellent professionals with comparable qualifications.

Chemistry is not the problem – chemistry is part of the solution for all matter based problems!

ChiroBlock has been engaged in chemical research and development for 25 years. We find innovative solutions each and every day. Explore the difference between ChiroBlock and a standard chemical manufacturer!

The main tasks of the vacant position as “Chemical Technician” include:

- Experimental work in the lab including reaction tests, reaction validations, analytical investigations and preparation of the scaling-up
- Close collaboration with chemists, project leaders and other laboratory technicians of our team
- Identification of technical problems and suggestions/measures to overcome them
- Detailed documentation of experiments and analytical results
- Active participation in - contribution to - all internal processes of quality management, safety and permanent improvement
- In case of interest and/or experiences: Support of our kg-lab (operating 60 l to 100 l glass-lined multi-purpose reactors and their periphery)

Depending on the skills, experiences and interests of the candidate, further tasks or responsibilities in purchasing, marketing, safety or quality control could also be assigned.

This position requires a sound knowledge basis as well as good practical skills in the field of synthetic chemistry and the ability to combine R&D approaches with industrial needs and economic figures. An understanding of the chemical industry and the will to contribute to innovation by chemical R&D is advantageous.

The applicant should be able to understand & to speak English and/or German. First experiences in a related working environment are regarded as plus, but are not required.

We offer

- a demanding, multi-faceted, creative job within a pure R&D company and flat hierarchies
- a position in a growing industry branch in the vibrant region Halle-Leipzig
- a motivating, stimulating remuneration
- flexible working hours without shiftwork
- the option to work part-time (30 hours per week minimum)
- a share in the annual company profit
- support in re-locating and learning German (if required)
- good options for a career development by taking over responsibilities for additional areas

The applicant should be open-minded and communicative with a sense for economic issues and with an attitude to serve customers. Good organizational and time management skills as well as a proactive approach to problem solving are needed.
